# Wouter Biegstraaten

Senior UX Designer at IEX Group  
Hilversum, North Holland Province, Netherlands

## Summary

UX & Customer Research. UI. Conceptor. Digital. Strategist. Customer journey. Prototyping. Facilitating design workshops and user interviews. Storytelling. I love the scope of working as a digital creative. Delivering online solutions that work in terms of design, usability and traffic. User centered thinking and good in turning ideas into pixels. The initial transition from concept and design to its online end station is where I find my passion: it is what I am good at. Thinking outside the box is one of my strong skills. It is my passion for my work makes me go that extra mile. Always looking for the answer to that one question: what would my user want. #userfirst.

Worked for a variety of clients both small and large. Both national and international.
